Pune, India | darekarshubham2005@gmail.com | +91 98348 10902 | github.com/Shubham0D4

Education

Dr. D. Y. Patil Institute of Technology, Pune

B.E. in Computer Engineering

Pune, India

Aug 2022 – May 2026

Experience

Cognizant Technology Solutions

GenC Next Intern – AI/ML & Data Science

Pune, India

Feb 2026 – May 2026

- Built ETL and data-warehouse pipelines processing 100K+ row datasets across 5+ configurations using Python and SQL, supporting reliable ingestion and transformation for downstream analytics.
- Applied 6+ supervised and unsupervised ML algorithms with feature engineering to structured business datasets, following an iterative development and validation workflow.
- Optimized SQL queries against production data, reducing query complexity by 40% and improving pipeline execution time.

Projects

Shelf – Full-Stack Digital Library Platform | *Spring Boot, React, MySQL, MongoDB, Docker*

Aug 2025

- Designed and implemented a Kindle-style personal library web application end-to-end, covering requirements, REST API design, and a React (Vite) frontend consuming a Spring Boot 3 backend.
- Built a data layer combining MySQL and MongoDB for relational and document metadata, with MinIO (S3-compatible) object storage for PDF/EPUB files.
- Designed JWT-based authentication and containerized the full stack with Docker for consistent local deployment and environment configuration.

aAuth – Published npm Authentication Library | *Node.js, Express, Prisma, MySQL, JWT*

Jun 2025 – Jul 2025

- Developed and published a plug-and-play authentication library for Node.js/Express applications, supporting signup, login, OTP verification, and password reset workflows.
- Implemented access/refresh token rotation, device tracking, and BCrypt hashing to support a multitenant authentication architecture reused across multiple downstream applications.
- Followed a structured development lifecycle: wrote a documented test-case suite covering valid and invalid inputs prior to release, and iterated on the public API surface based on test feedback.

alpha-sql – Published npm Query-Builder Library | *JavaScript, Node.js, mysql2*

Mar 2025

- Built and published a fluent query-builder API over mysql2, exposing 15+ utility functions (connect, insert, find variants, update, delete, rawQuery) supporting joins, subqueries, grouping, and window functions.
- Authored a documented automated test suite validating both valid and invalid input handling, treating testing as a first-class part of the release process for a public package.

Technical Skills

Languages: Java, Python, JavaScript/TypeScript, SQL, Bash, C++ (DSA/problem-solving)

Backend & Frameworks: Spring Boot, Spring Data JPA, Spring Security, FastAPI, Node.js, Express.js, REST APIs

Frontend: React, Vite, React Router, Axios

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Prisma ORM

Tools & Platforms: Git, Docker (build/run containers locally), GCP (IAM, hosting)

Concepts: Software Development Life Cycle (Agile), System Design (HLD & LLD), OOP, Data Structures & Algorithms, Automated Testing

Certifications

Database Management Systems (DBMS) – NPTEL/IIT, 2024

Machine Learning, Feature Engineering, SQL Advanced, Python, ETL & Data Warehousing – Udemy Professional Certificates, 2024–2025
