EDUCATION

Dr. D. Y. Patil Institute of Technology
Bachelor of Engineering in Computer Science

Aug. 2022 – May 2026
Pune, Maharashtra

Maharashtra Jr. College
Higher Secondary Certificate (HSC), Science

2020 – 2022
Ahmednagar, Maharashtra

WORK EXPERIENCE

Cognizant Technology Solutions
GenC Next Intern – AI/ML & Data Science

Feb. 2026 – May 2026
Pune, India

- Developed and maintained **end-to-end ETL and data pipeline software**, processing structured datasets of **100K+ rows** across 5+ pipeline configurations using **Python and SQL**
- Applied **6+ supervised and unsupervised machine learning algorithms** with feature engineering, gaining hands-on experience with **data structures** and systematic model evaluation
- Debugged and optimised **SQL queries**, reducing average query complexity by **40%** on sample datasets through systematic troubleshooting

PROJECTS

Shelf – Full-Stack Personal Digital Library Platform

Java, Spring Boot, React, MySQL, MongoDB, Docker

- Developed a full-stack web application with a **Java / Spring Boot 3 REST API** backend (Spring Data JPA + MongoDB) and a React frontend for uploading, storing, and reading digital books online
- Designed JWT-based authentication with Spring Security and containerized backend services with Docker to meet consistent deployment requirements

alpha-sql – Published npm Package for MySQL Query Building

JavaScript, Node.js, MySQL

- Designed and published an **npm package** providing a fluent query-builder API over `mysql2`, supporting CRUD operations, joins, subqueries, grouping, and window functions across 15+ utility functions
- Wrote a structured **test case suite** covering valid and invalid inputs for each function to verify correct behaviour and error handling, adhering to consistent coding standards throughout the module

Kai – Multi-Agent AI Investment Analysis System

Python, FastAPI, React, Groq (Llama 3), Gemini ADK, PostgreSQL

- Architected a 4-agent LLM orchestration system (Coordinator, Fundamental, Sentiment, Valuation) with a structured debate loop, producing outputs across 2 LLM providers
- Engineered agentic workflows with **REST API** integrations across **3 live data sources** (Yahoo Finance, SEC EDGAR); built a full-stack **FastAPI + React/Vite** frontend with 5+ interactive Recharts dashboards, developed with the help of **AI-assisted coding tools** (Cursor, Copilot)

SKILLS

Languages : Java, Python, JavaScript/TypeScript, C++ (Data Structures & Algorithms), SQL, Bash

Backend & APIs : Spring Boot, Spring Data JPA, Spring Security, Node.js, Express.js, FastAPI, REST API Development

Frontend : React, Vite, React Router, Axios

Databases : MySQL, PostgreSQL, MongoDB, SQLite, Prisma ORM

Practices : Debugging & Troubleshooting, Unit/Integration Testing, Code Reviews (informal), Docker, Git, CI/CD (familiar)

Tools : Postman, WebSockets, JWT, npm Package Publishing, LLM, AI-agents

CERTIFICATIONS

Database Management Systems (DBMS) – NPTEL, IIT Certification

2024

Machine Learning, Feature Engineering, SQL Advanced, Python, ETL & Data Warehousing – Udemy Professional Certificates

2024 – 2025
